Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the Subject Application:

Listing of the Claims

Claim 1 (currently amended): <u>In combination</u>, A <u>a</u> holder for <u>and</u> a removable memory component of a device, the holder comprising:

a removable memory component; and

a holder, comprising:

a body having a pocket therein sized to receive at least one the removable memory component of the device therein through a pocket opening in the body;

a reclosable pocket closure attached to the pocket and completely covering the pocket opening; and

a retainer removably attaching the body to <u>at least</u> a portion of the device, <u>wherein the removable memory component is adapted to be employed with the device</u>.

Claim 2 (original): The holder of claim 1, wherein the body is formed from an anti-static material.

Claim 3 (original): The holder of claim 1, wherein the pocket is lined with an antistatic material.

Claim 4 (original): The holder of claim 1, wherein the retainer comprises a piece of hook and loop material attached to the body and to a portion of the device.

Claim 5 (currently amended): The holder of claim 1, wherein the retainer comprises a clip attached to the body and attachable to <u>at least</u> a portion of the device.

Claim 6 (original): The holder of claim 1, wherein the retainer comprises a recess formed in the body and sized to detachably receive a correspondingly-shaped protrusion on the device.

Claim 7 (previously presented): The holder of claim 1, wherein the retainer comprises a strap-receiving loop coupled to the body.

Claim 8 (original): The holder of claim 7, wherein the strap-receiving loop is integrally formed with the body.

Claim 9 (previously presented): The holder of claim 7, wherein the strapreceiving loop comprises an elongate member coupled to the body and forming a strapreceiving opening between the elongate member and the pocket.

Claim 10 (original): The holder of claim 9, wherein the elongate member is coupled to the body by fasteners selected from the group consisting of adhesive, screws, rivets, snaps, and hook and loop material.

Claim 11 (previously presented): The holder of claim 1, wherein the reclosable pocket closure is a zipper formed in the body.

Claim 12 (previously presented): The holder of claim 1, wherein the reclosable pocket closure is a flap affixed to a portion of the body and detachably attached to another portion of the holder such that it covers the pocket opening.

Claim 13 (original): The holder of claim 1, further comprising an insulating material in the pocket.

Claim 14 (currently amended): The holder of claim 1, further comprising removable memory component identifying indicia on the body.

Claim 15 (original): The holder of claim 14, wherein the indicia include color.

Claim 16 (currently amended): The holder of claim 14, wherein the indicia indicate the memory storage capacity of the <u>removable</u> memory <u>component</u> emponents.

Claim 17 (original): The holder of claim 1, wherein the body is formed from material selected from the group consisting essentially of polymeric material, cloth, leather and canvas.

Claim 18 (currently amended): <u>In combination</u>, A <u>a</u> holder for <u>and a</u> at least one removable memory component of a device, the holder comprising:

a removable memory component; and

a holder, comprising:

be employed with the device.

means for supporting the <u>removable</u> memory <u>component</u> components having an opening, the means for supporting not forming a part of the device; means for selectively retaining the <u>removable</u> memory <u>component</u> components within the means for supporting, the means for selectively retaining completely covering the opening and attached to the means for supporting; and means for removably <u>retaining</u> attaching the means for supporting to <u>at</u> least a portion of the device, wherein the removable memory <u>component</u> is adapted to
